# Twin Fan Sprayer

## Better coverage at higher speeds

High volume soft air combined with fine to medium droplet sizes means more uniform coverage, it's that easy.

With 2 x 900mm fans are hydraulically driven producing an air delivery that is perfectly even both sides (unlike conventional sprayers).

The extra wide attack angle achieved by the 900mm fans, means we reduce shingling and increase sphere coverage ability.

Our Interlink sprayer range now features Ertalon technology on all arms and pivot points, reducing overall maintenance in these areas.

2000 to 5000ltr Poly Tanks available  
Low/Medium/High Pressure Pumps available

4 wheel independent axle  
Floatation tyres 150:400mm  
2 point tracking hitch  
Poly-tech coated frame and chassis  
Vertical boom control available

Food machinery oil  
Auto rate controller available  
Fitted with chemical induction ports  
Chemical resistant hydraulic hose  
German hydraulic filtration
