Power Prop 900 - Citrus

Better coverage at higher speeds

High volume soft air combined with fine to medium droplet sizes means more uniform coverage, its that easy.

With 900mm fans we minimise the gap, often associated with multi fan sprayers.

Extra wide attack angle achieved by 900mm fans, means we reduce shingling and increase sphere coverage ability. This is perfect for large citrus fruits.

Easily adjusted for different row spacings and plantings.

Our Interlink sprayer range now features Ertalon technology on all arms and pivot points, reducing overall maintenance in these areas.

2000 to 5000ltr Poly Tanks available
Low/Medium/High Pressure Pumps available

4 wheel independent axle
Floatation tyres 150:400mm
2 point tracking hitch
Poly-tech coated frame and chassis
Parallelogram boom width control available
Lay down boom option available

Food machinery oil
Auto rate controller available
Fitted with chemical induction ports
Chemical resistant hydraulic hose
German hydraulic filtration
